Riedel Sommeliers Burgundy Grand Cru Wine Glass (main photo): This glass was described by Decanter magazine as "The finest Burgundy glass of all time, suitable for both young and old Burgundies." Its shape, developed in 1958, represented a quantum leap in terms of wine glass design, and has earned it a place in the permanent display of the New York Museum of Modern Art. This beautiful monster of a glass can take apart a lesser wine, mercilessly showing up its weaknesses. But a great wine - a top-class Burgundy, Barolo or Barbaresco - will be revealed in all its glory. The large bowl allows the bouquet to develop to the full, while the slightly flared top lip maximises the fruit flavours by directing a precise flow onto the front palate.

Certain wines and grape varieties require this type of controlled delivery. By ensuring that the fruit is highlighted while using the marked acidity of the wine to keep the flavours in balance, this is a glass that produces a superbly three-dimensional taste picture. Height: 24.8cm or 9 3/4" Volume: 1050ccm or 37oz Quantity: 1 Riedel Sommeliers Bordeaux Grand Cru Wine Glass (second photo): This glass, first created in 1959, is not a design gimmick but a precision instrument, developed to highlight the unique characteristics of the great wines of Bordeaux. The large bowl (capacity 30 oz) brings out the full depth of contemporary wines made from Cabernet Sauvignon, Cabernet Franc and Merlot. Modern vinification techniques enable winemakers to concentrate the fruit to such an extent that young wines may seem one-dimensional, tannic and over-oaked if served in smaller glasses. The Sommeliers Bordeaux Grand Cru gives breathing space to both young and more mature wines, unpacking the various layers of bouquet and delivering a full spectrum of aromas. On the palate, the texture of the wine - soft, silky, velvety - is intensified and the finish prolonged, gently blending acidity with supple, sweet tannins. This is a glass that showcases these majestically structured red wines in all their complexity and finesse. Height:
